Serial No.: 09/498,064

Group Art Unit: 2871

Filed: February 4, 2000

Examiner: David Y. Chung

For: LIQUID-CRYSTAL DISPLAY DEVICE AND METHOD FOR PRODUCTION THEREOF

Honorable Assistant Commissioner of Patents
Washington, D.C. 20231

AMENDMENT UNDER 37 C.F.R. §1.111

Sir:

In response to the Office Action dated June 19, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend the claims to read as follows:

1. (Amended) A liquid-crystal display device comprising:
- a plurality of address wirings formed on an insulating substrate;
 - a gate insulating film formed on said address wirings;
 - a plurality of data wirings, said data wirings crossing said address wirings;
 - an upper layer insulating film grown on said data wirings; and
 - a picture element area comprising:
 - a transparent electrode, comprising a transparent conductive film, formed on said upper layer insulating film and surrounded by said address wirings and said data wirings;
 - a thin-film transistor section for selectively connecting said data wirings with said transparent electrode by a gate connected to said address wirings; and
 - a capacitor section comprising a first electrode formed on said gate insulating film and comprising the same conductive film as in said data wirings, a second electrode formed on said upper layer insulating film and comprising the same transparent conductive film as in said transparent electrode, and at least a portion of said upper layer insulating film
